QA & Science Reasoning Datasets

https://huggingface.co/datasets/microsoft/wiki_qa?utm
QA pairs from real Bing queries with Wikipedia passages.
Use in project: Adds general-purpose reading comprehension and background knowledge.

https://huggingface.co/datasets/allenai/openbookqa?utm
Open-book style science exam questions with reasoning required.
Use in project: Helps the agent provide step-by-step reasoning explanations for answers.

https://huggingface.co/datasets/allenai/mathfish?utm
Math QA dataset for curriculum-linked reasoning.
Use in project: Boosts the agent's math tutoring capabilities, especially stepwise explanations.

Specialized QA / Exams
https://huggingface.co/datasets/prsdm/Machine-Learning-QA-dataset?utm
Focused QA dataset on ML topics.
Use in project: Directly supports domain-specific tutoring for ML and AI courses.

knowledgator/Scientific-text-classification

CodeSearchNet (Python subset with summaries) —
https://huggingface.co/datasets/Nan-Do/code-search-net-python
Functions + short summaries; good for **explanation generation & snippet retrieval**.

Usage:
```
from datasets import load_dataset
ds = load_dataset("Nan-Do/code-search-net-python")
```

Programming Books (synthetic) —

https://huggingface.co/datasets/codeparrot/apps
APPS programming problems with solutions/tests → **rich practice generation + auto-grading + hinting**.

https://huggingface.co/datasets/DenCT/codeforces-problems-7k
~7k Codeforces problems with tags → **DSA ladders, difficulty calibration, adaptive progression**.

https://huggingface.co/datasets/sentence-transformers/codesearchnet
Code ↔ docstring pairs (multi-lang) → **RAG over code, retrieval for examples, explanation alignment**.

Additional Datasets

EdNet - https://github.com/riiid/ednet
This dataset is the largest public dataset(AI tutoring platform in Korea)
Includes answering questions, videos, and reviewing content
Excellent for student modeling, tracking different kinds of interactions, and building content recommendation/engagement prediction.

XES3G5M - https://github.com/ai4ed/XES3G5M
Math focused
Good for KT + fine-grained modeling

Not considering for now

https://huggingface.co/datasets/open-phi/programming_books_llama
400M tokens of programming book-style text; good for **style-tuned explanations** (use with care)

Usage:
from datasets import load_dataset
ds = load_dataset("open-phi/programming_books_llama")
